This is a fantastic piece of kit. It's small light and durable. I have to admit I was a little unsure at first, but after taking it out and using I was surprised how fast it was charging my phone, watch, and AirPods without issue! I definitely recommend this to everyone who wants a compact and convenient wireless charger to take with them, whether for work or travel I guarantee you won't be disappointed! I took it to work and with the flat pads on either end I charged 2 phones with ease! What I like also is that you don't have to open it completely if you want to just charge 1 device. You can just leave it compact and place your phone on top, and it works! Much more convenient than other wireless chargers out there!
